# WELCOME TO THE 45<sup>TH</sup> ANNUAL HYLINE ANGUS BULL SALE!

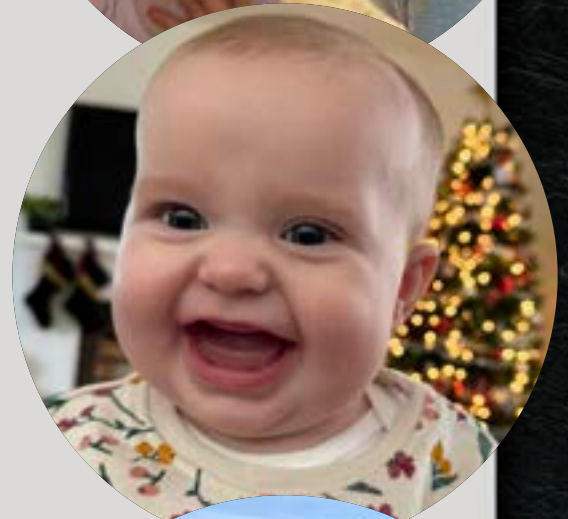

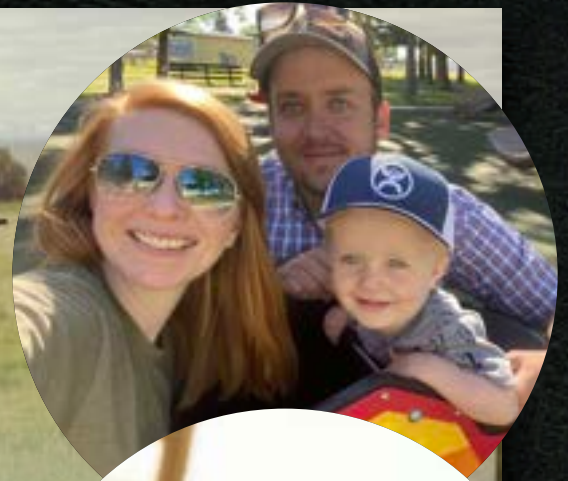

## DEAR CATTLEMEN,

Welcome to our 45th Annual Bull Sale! Since the inception of Hyline Angus Ranch 65 years ago we have always worked to identify cow families that thrive under our western range conditions. We have done this through Montana Beef Performance Association and now through AHIR. Most of the cow families in our herd go back at least ten generations, with progeny ratios of over 100 on their calves. By only keeping the top producers in the herd and culling the rest -- our cattle are practical, predictable, and profitable.

We are proud to be a family operation consisting of Ben, Kirby, Leo (4), and Isla (8 months); along with Alice and myself. It has been a great year in the cattle business with record prices for feeders, yearlings, and bred cows. Hopefully we can keep these prices for a few more years! I hope you all had a great year and are doing well.

The bulls selling are stout and sound. They will increase your weaning weights and leave your females with added value. This year the bulls were weaned May 15th and turned back out on grass until the end of October. They were started on feed November 1st. We feel by limiting the amount of time in the feedlot will help ensure soundness in the future. The bulls are performance tested, PAP tested and fertility tested they are ready to go work for you. PAP results will be available the first part of February. Normally the results are in the catalog but we wanted to wait as long as possible to test them for more accurate results. This is an awfully good set of bulls and we know they will work really well for you. We truly appreciate your continued support of our program.

Please join us February 25, 2024 at Headwaters Livestock in Three Forks for a delicious prime rib lunch at noon with the sale starting at 1pm. Hope to see you sale for good conservation and a great set of bulls!

Welcome to the 45th Annual Bull Sale at Hyline Angus Ranch, a historic and esteemed program nestled in the heart of the Gallatin Valley. Over the years, this ranch has witnessed the evolution of the Angus industry, adapting to changes while remaining steadfast in their commitment to excellence.

Since their inception, they have prioritized a breeding program that combines the best of phenotype and performance. As one of the early herds to embrace performance testing, they have consistently sought to enhance the genetic potential of their cattle. Today, with the aid of advanced DNA tools, Hyline continues its pursuit of cattle that not only align with their established phenotype and performance standards but also contribute to the precision of their EPDs.

Hyline's emphasis on maternal qualities sets them apart, recognizing the critical role they play in the success of any breeding program. Through three generations of dedicated development, they have refined their approach, always striving for excellence in every aspect.

Join us February 23rd, celebrating the legacy of Hyline Angus Ranch and exploring the results of decades of meticulous breeding. We invite you to be a part of this event and invest in bulls that embody resilience and quality synonymous with the Hyline name.

## AN OLD FARMERS ADVICE

1. Your fences need to be horse-high, pig-tight and bull-strong.
2. Keep skunks and bankers at a distance.
3. Life is simpler when you plow around the stump.
4. A bumble bee is considerably faster than a John Deere tractor.
5. Words that soak into your ears are whispered...not yelled.
6. Meanness don't jes' happen overnight.
7. Forgive your enemies. It messes up their heads.
8. Do not corner something that you know is meaner than you.
9. It don't take a very big person to carry a grudge.
10. You cannot unsay a cruel word.
11. Every path has a few puddles.
12. When you wallow with pigs, expect to get dirty.
13. The best sermons are lived, not preached.
14. Most of the stuff people worry about ain't never gonna happen anyway.
15. Don't judge folks by their relatives.
16. Remember that silence is sometimes the best answer.
17. Live a good, honorable life. Then when you get older and think back, you'll enjoy it a second time.
18. Don't interfere with somethin' that ain't botherin' you none.
19. Timing has a lot to do with the outcome of a rain dance.
20. If you find yourself in a hole, the first thing to do is stop diggin'.
21. Sometimes you get, and sometimes you get got.
22. The biggest troublemaker you'll probably ever have to deal with, watches you from the mirror every mornin'.
23. Always drink upstream from the herd.
24. Good judgment comes from experience, and a lotta that comes from bad judgment.
25. Lettin' the cat outta the bag is a whole lot easier than puttin' it back in.
26. If you get to thinkin' you're a person of some influence, try orderin' somebody else's dog around.
27. Live simply. Love generously. Care deeply. Speak kindly.

## ANGUS

THANK YOU TO OUR BUYERS!

## HIGH MOUNTAIN DISEASE

High Mountain Disease, or commonly known as Brisket Disease, is a very common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure.

Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be “sub-clinical”, meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal’s potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the angus breed, we can evaluate that animal’s potential to pass on genetic traits that can greatly influence the performance of that animal’s offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.
